

Below are some useful links...

- HSE 'Frequently Asked Questions about Glyphosate' <http://www.hse.gov.uk/pesticides/topics/using-pesticides/general/glyphosate-faqs.htm> This is a really useful site with the Government, via the HSE, addressing glyphosate safety, including amenity use.
- Bayer's 'Let's talk about glyphosate' pages: <https://www.bayer.com/en/glyphosate-roundup.aspx> and these lead on to more pages and resources
- European Food Safety Authority <https://www.efsa.europa.eu/en/topics/topic/glyphosate> This site explains why the European Food Safety Authority came to a different conclusion about glyphosate compared to the International Agency for Research on Cancer. *Note, the recent litigation cases are basing their whole argument around the IARC ruling which runs against every other regulatory body in the world, including several other arms of the World Health Organisation and the WHO itself (SEE: Attached Infographic).*
- Glyphosate Task Force www.glyphosate.eu
- Amenity Forum www.amenityforum.co.uk
